

test5 JUnit5 Óscar Arauz Pérez

The screenshot displays an IDE interface for a Java project named `test5Junitmvn`. The project structure on the left includes `src > test > java > ShoppingCartTest`. The code editor shows the `testEmpty()` method in `ShoppingCartTest.java`:

```
53  /**
54  * Tests the emptying of the cart.
55  */
56  public void testEmpty() {
57
58      _bookCart.empty();
59
60      assertTrue(_bookCart.isEmpty());
61  }
```

The Run console at the bottom shows the execution results for `ShoppingCartTest`:

Test Method	Duration
testProductRemove	0 ms
testEmpty	0 ms
testProductAdd	0 ms
testProductNotFound	0 ms

The console output indicates that all tests passed: `Tests passed: 4 of 4 tests - 0 ms`. The process finished with exit code 0.
